USER MANUAL & INSTALLATION GUIDELINE

This user manual is applying for this web-based application only. Please follow exactly steps by steps to run this web-based application

1) SOFTWARE & HARDWARE REQUIREMENTS

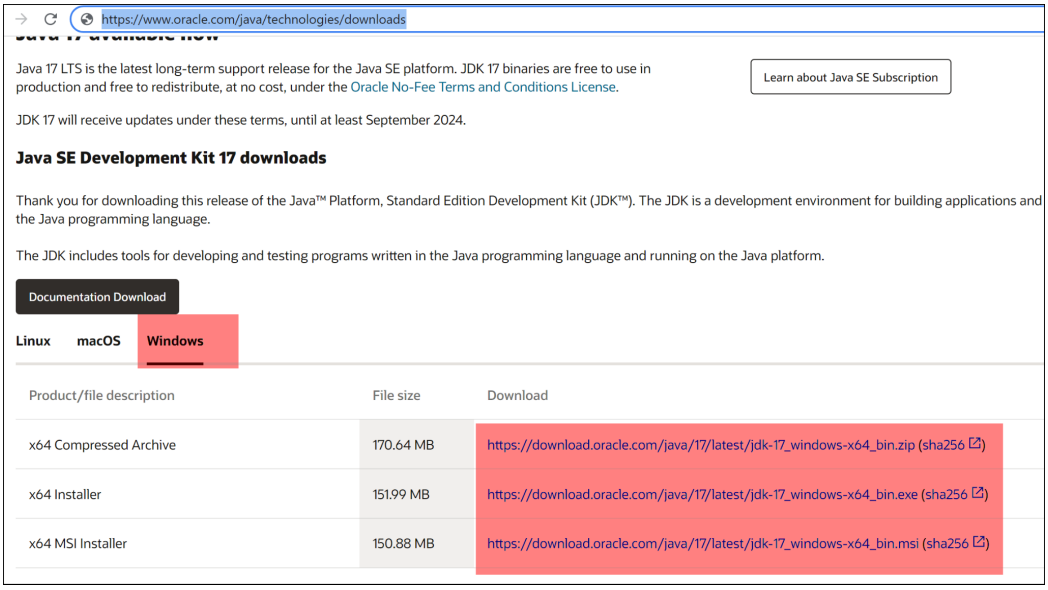
a) Java SDK
b) NodeJS
c) Angular
d) Spring Tools Suite

2) INSTALLATION

a) Install JAVA SDK

i) Step 1. Go to https://www.oracle.com/java/technologies/downloads

ii) Step 2. Select platform to download (e.g, Windows) and click on link in Download column to download JAVA SDK file



iii) Step 3. Run downloaded file and complete installation steps by steps

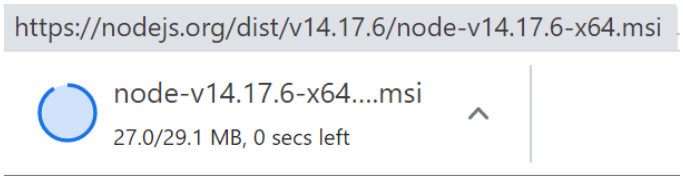
b) Install NodeJS

i) Step 1. Go to https://nodejs.org/en/download/. Download appropriate version (In this case, we selected the last Windows Version

ii) Step 2. Run Installation File

iii) Step 3. Keep all default values and click the **Next** button until completing the process.

iv) Step 4. Open CMD and run command to check version of NodeJS



https://nodejs.org/dist/v14.17.6/node-v14.17.6-x64.msi
node-v14.17.6-x64....msi

Node.js Setup
Tools for Native Modules
Optionally install the tools necessary to compile native modules.
Some npm modules need to be compiled from C/C++ when installing. If you want to be able to install such modules, some tools (Python and Visual Studio Build Tools) need to be installed.
Automatically install the necessary tools. Note that this will also install Chocolatey. The script will pop-up in a new window after the installation completes.
Alternatively, follow the instructions at https://github.com/nodejs/node-gyp#on-windows to install the dependencies yourself.

Check Version to verify installed NodeJS successfully

c) INSTALL ANGULAR

i) **Step 1.** Open CMD -> Navigate to Angular Folder of project (In this project folder name is "**employee_management_system_angular"**)

For example: We stored the project in the D directory of the computer. So we use following command line:

- Open **CMD**
- Type **D:**
- Use **cd \path** (path is location of folder)

```
C:\Users\Jessica>D:

D:\>cd D:\Project\EMS\employee_management_system_angular

D:\Project\EMS\employee_management_system_angular>
```

ii) **Step 2.** Run **npm install**

```
D:\Project\EMS\employee_management_system_angular>npm install
```

```
npm WARN optional SKIPPING OPTIONAL DEPENDENCY: node-sass@4.10.0 po
stinstall: `node scripts/build.js`
npm WARN optional SKIPPING OPTIONAL DEPENDENCY: Exit status 1

added 1155 packages from 1171 contributors and audited 1290 package
s in 60.053s

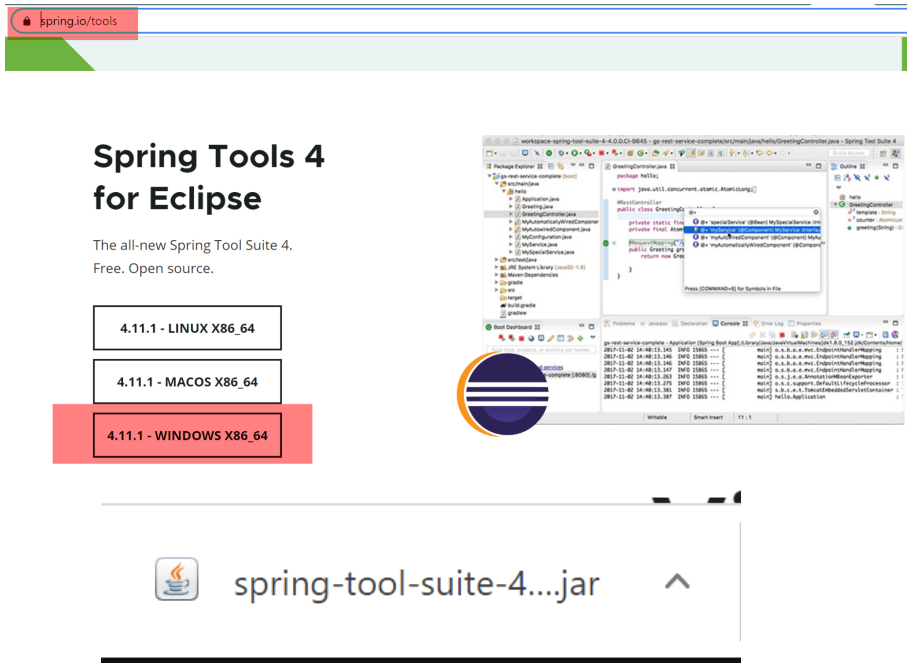
9 packages are looking for funding
  run `npm fund` for details

found 208 vulnerabilities (74 low, 27 moderate, 104 high, 3 critica
l)
  run `npm audit fix` to fix them, or `npm audit` for details

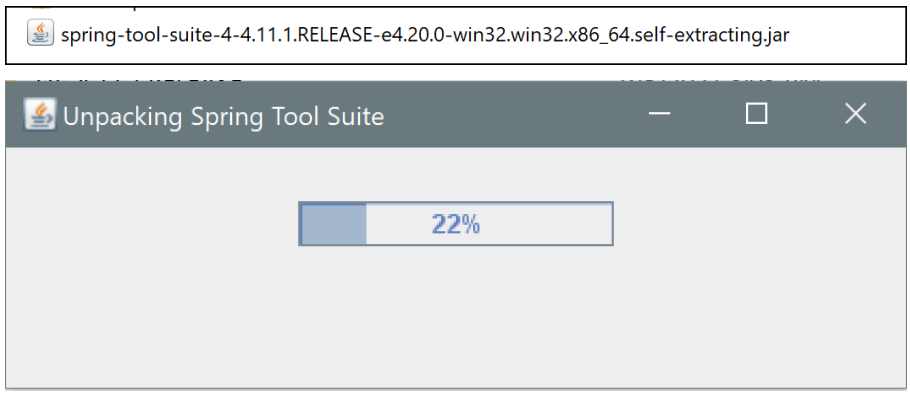
D:\Project\EMS\employee_management_system_angular>
```

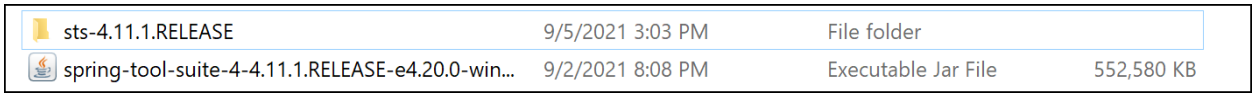
d) INSTALL SPRING TOOLS SUITE

i) **Step 1.** Go to https://spring.io/tools and download appropriate version (We installed **Spring Tools 4 for Eclipse - 4.11.1 - Windows X86_64**)

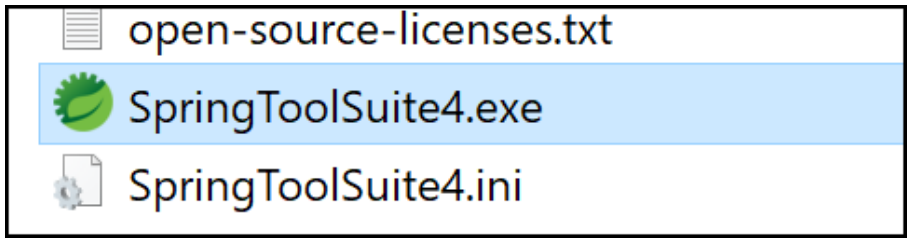


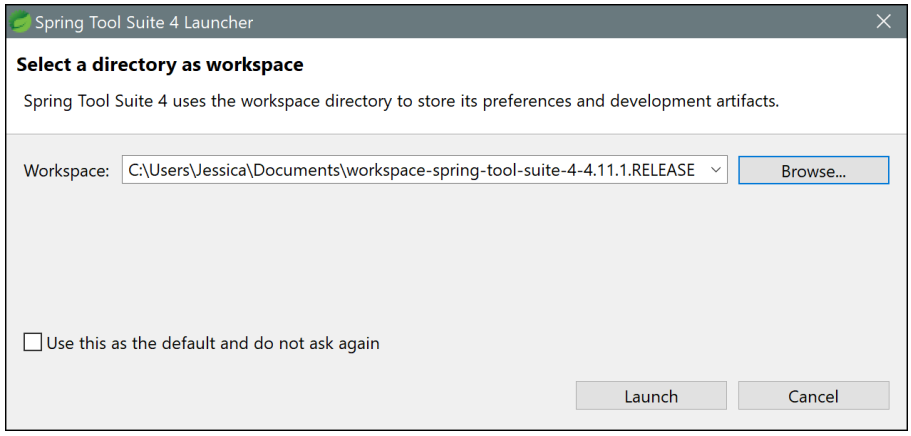
ii) **Step 2.** Run downloaded file ***"spring-tool-suite-4-4.11.1.RELEASE-e4.20.0-win32.win32.x86_64.self-extracting.jar"*** *and it will extract to folder name* ***"sts-4.11.1.RELEASE"***

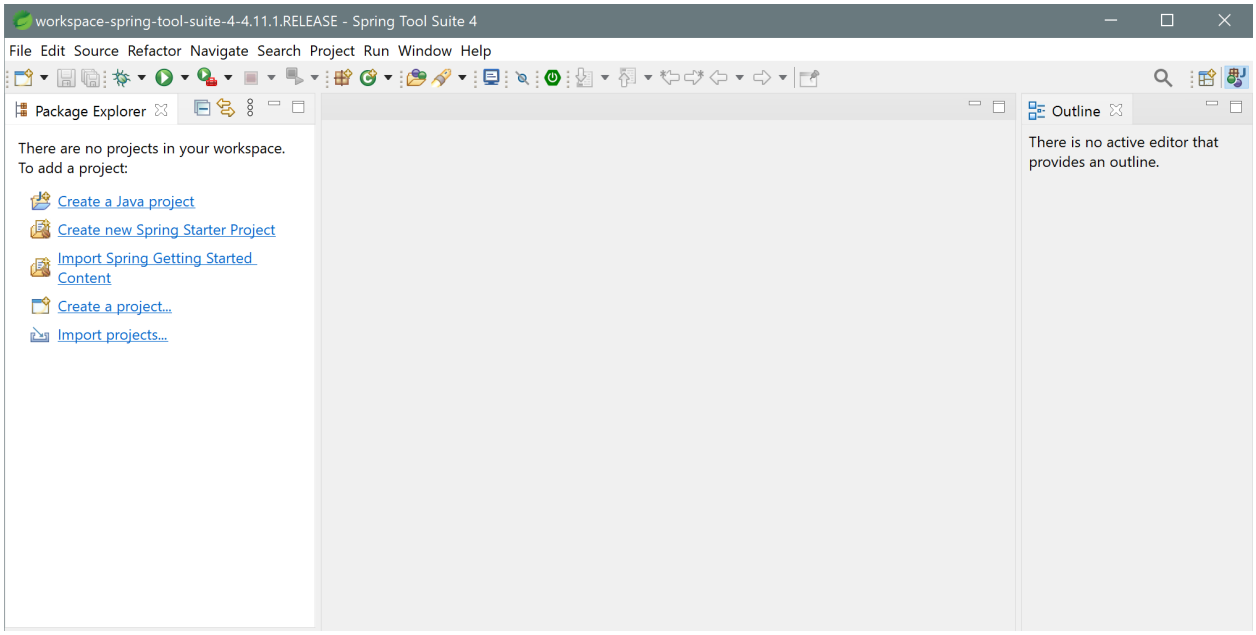




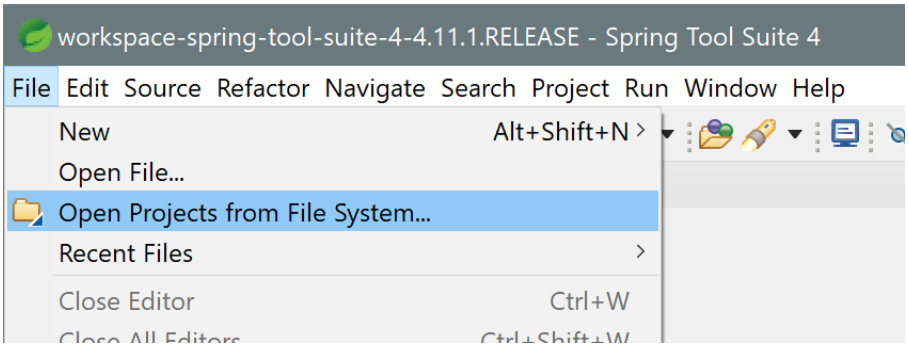
iii) **Step 3.** Open **"sts-4.11.1.RELEASE"** folder and run **SpringToolSuite4.exe** file

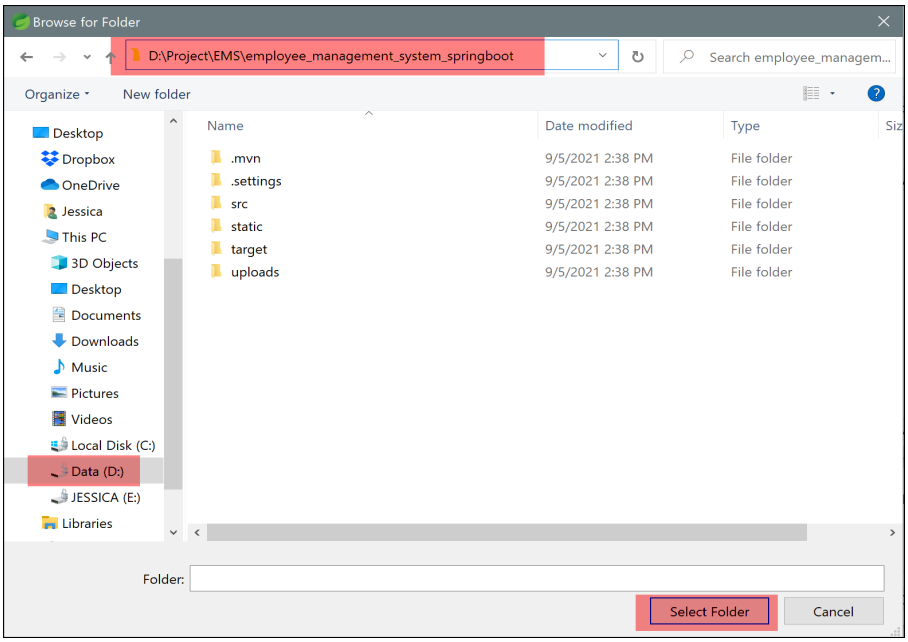


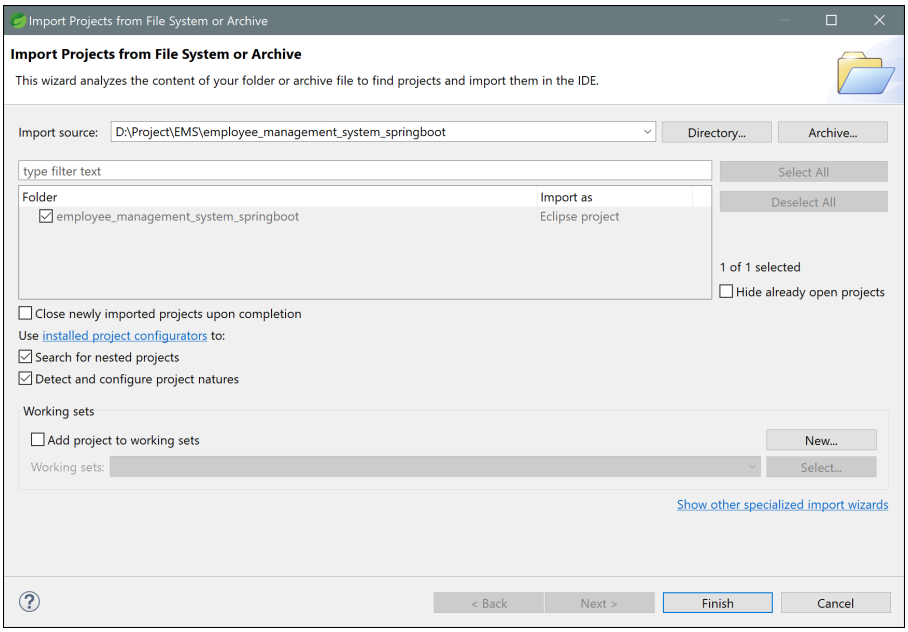


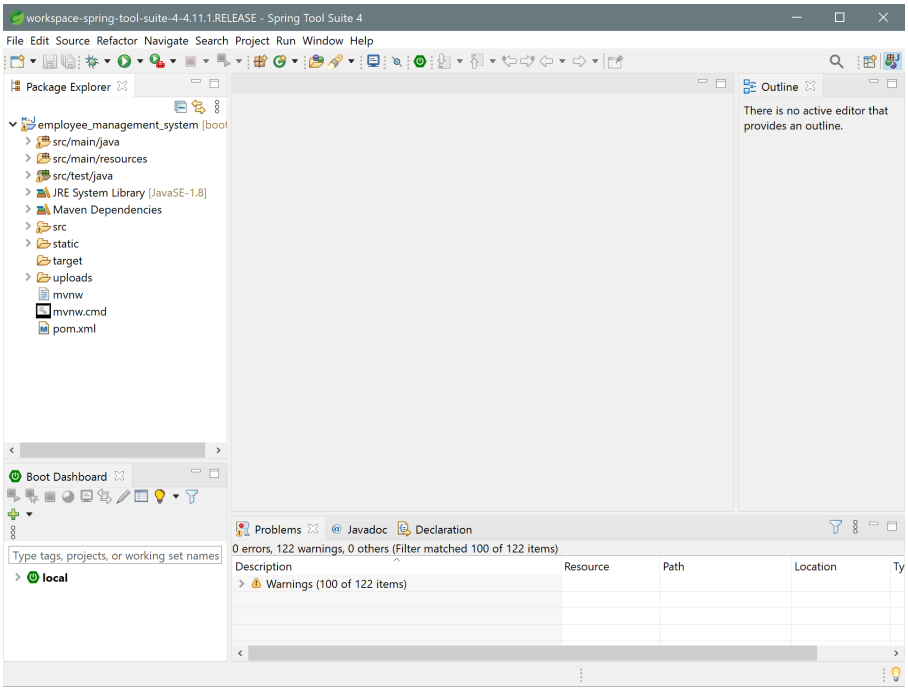


iv) Step 4. Click File





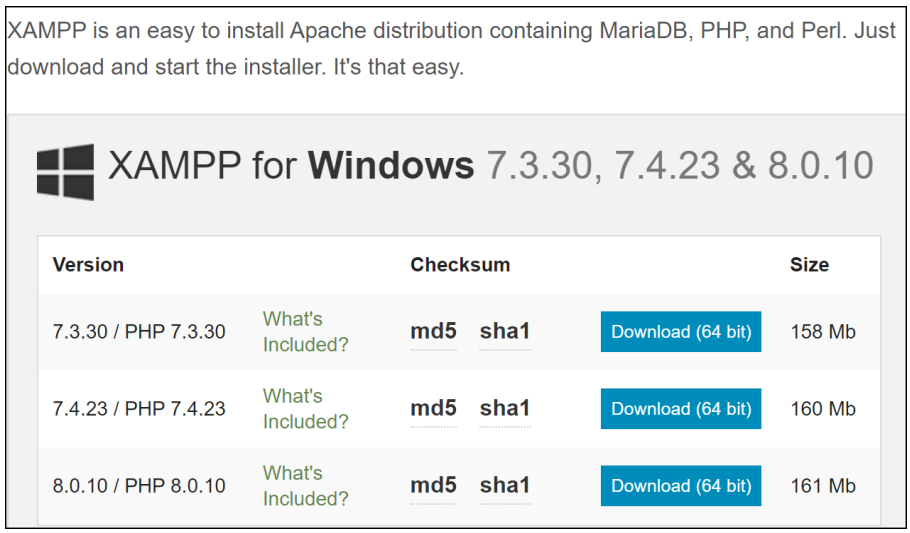




Complete All Steps to Install Spring Tools. Move To next section

e) INSTALL XAMPP

i) Step 1. Go to https://www.apachefriends.org/download.html and download the latest version



ii) Step 2. Install XAMPP by clicking **"xampp-windows-x64-8.0.10-0-VS16-installer" file**

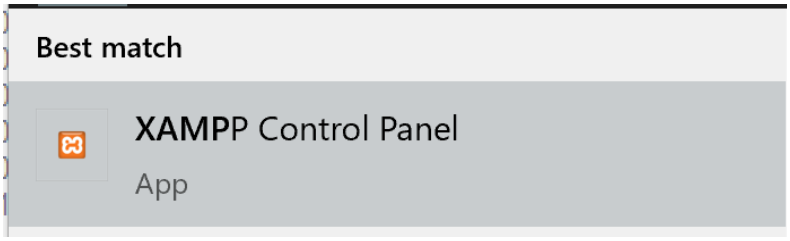
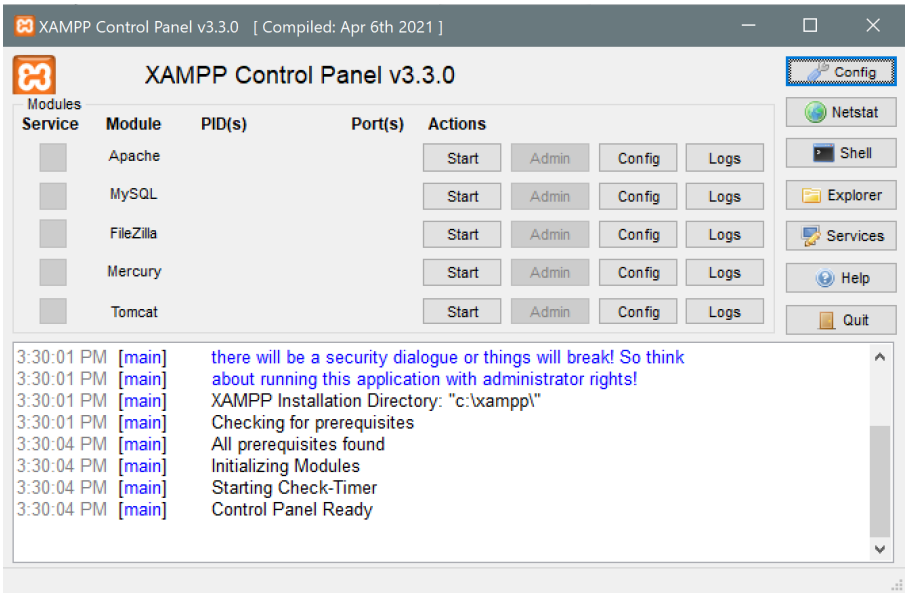
3) RUN PROJECT

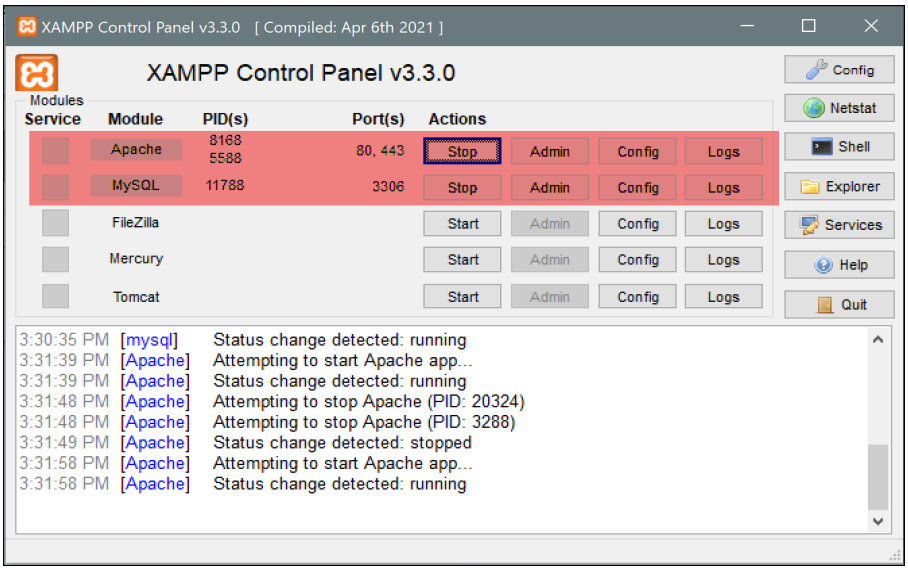
a) Run XAMPP and Start MySQL Server

i) Step 1. Search "XAMPP Control Panel" from menu and open this application



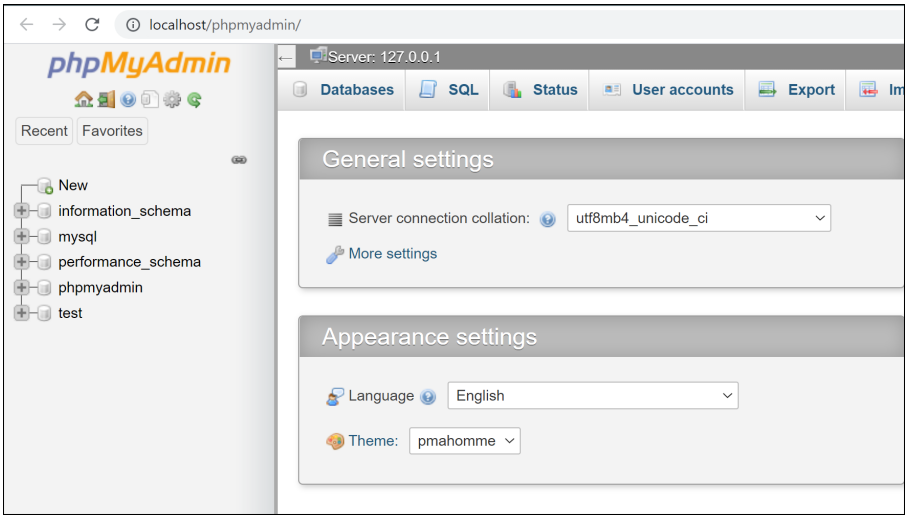


ii) Step 2. After open XAMPP Control Panel, click on "Start" button on Apache and MySQL



iii) Step 3. Click on "Admin" button of MySQL to access MySQL Admin PHP

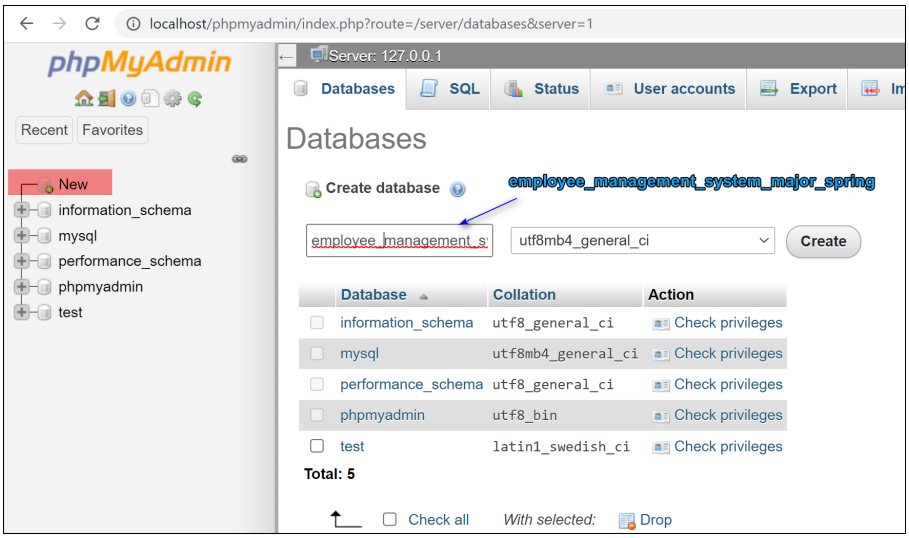
page



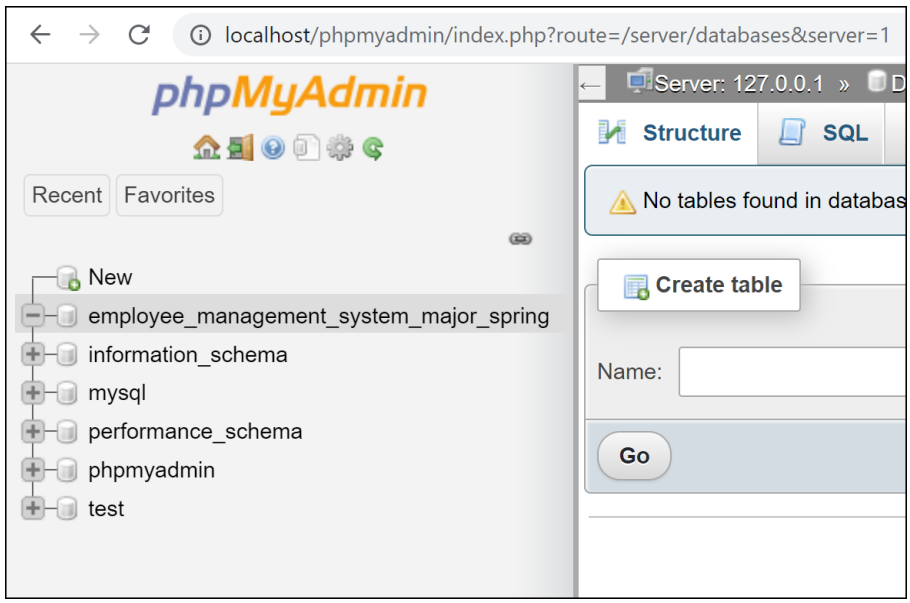
iv) **Step 4.** Click on **New** to create new database

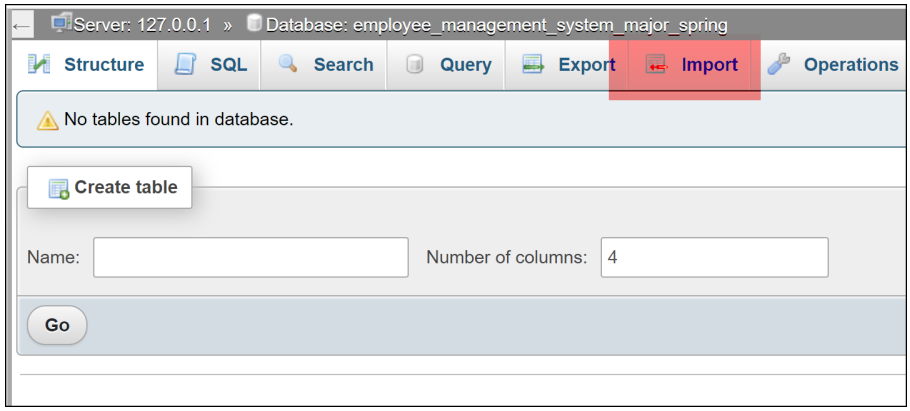
(1) Database Name: ***employee_management_system_major_spring***

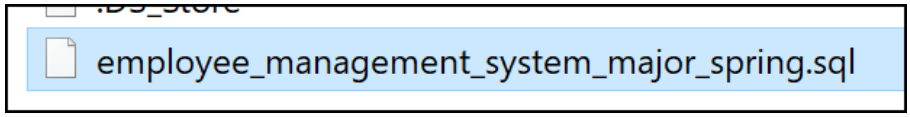
(2) Click on "Create" button

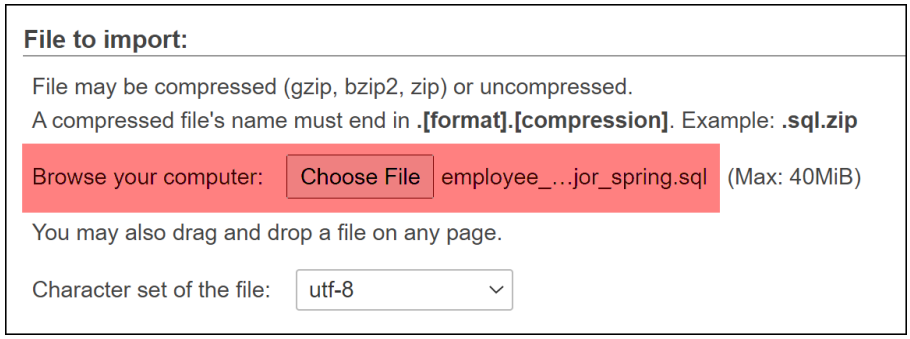


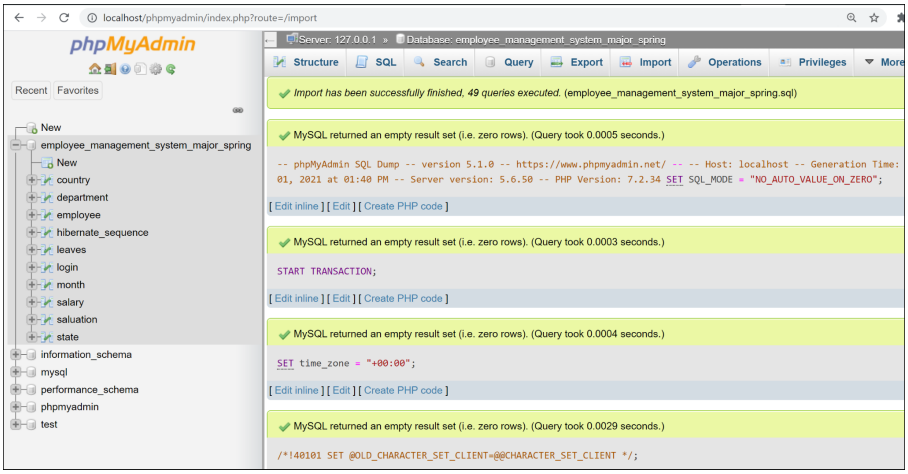
v) **Step 5.** Click on **Import** button > **Choose File:** select ***"employee_management_system_major_spring.sql"*** to import to this database











After importing completely, the tables of database are displayed as above screenshot

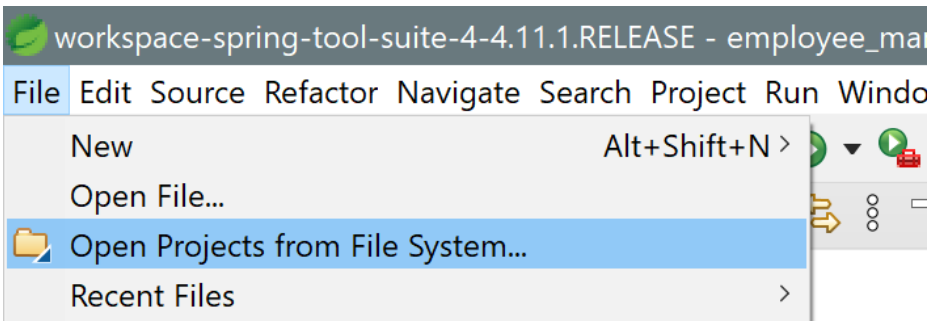
b) Open Spring Suite Tools and Boot App

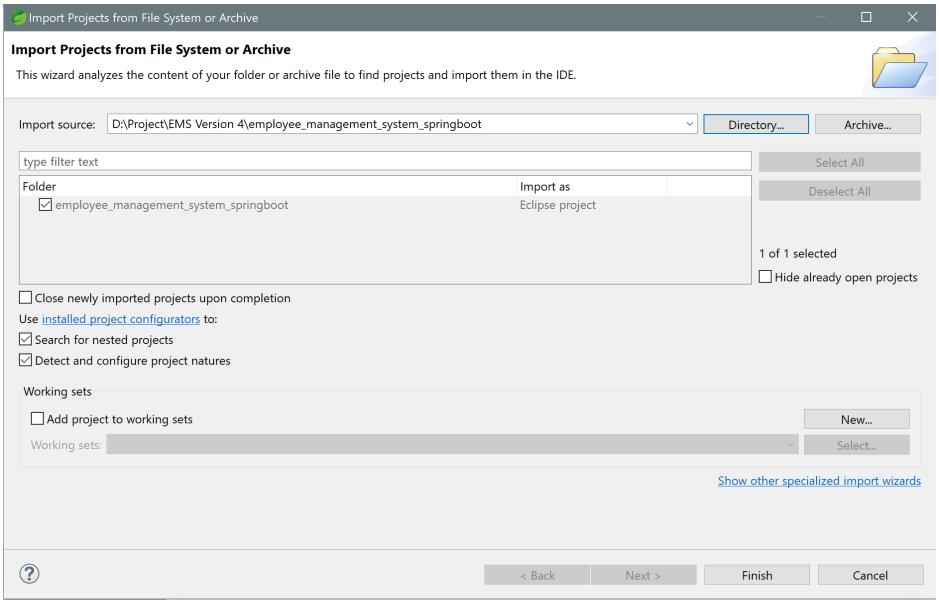
c) Open Spring Suite Tools and Boot App

i) Step 1. Open Spring Suite Tools > File > Open Projects from File System

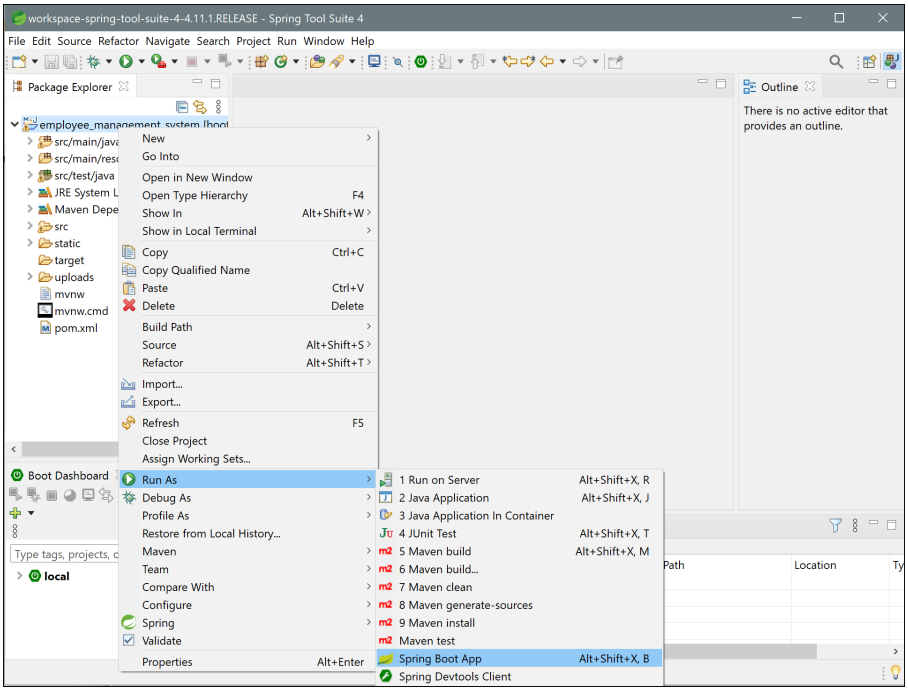
(1) Select **"employee_management_system_springboot"** folder

(2) Click on Finish to import this project

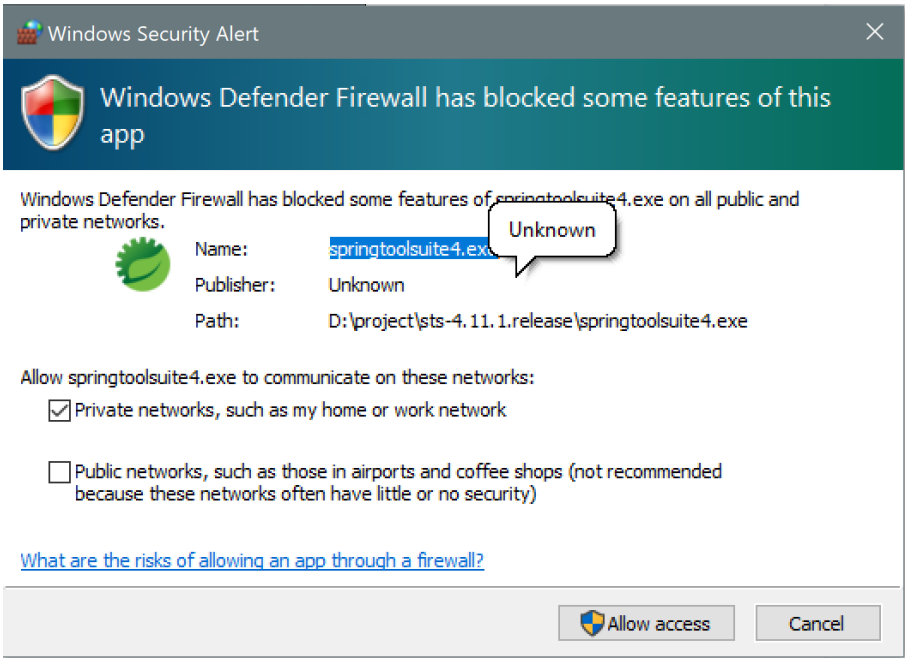


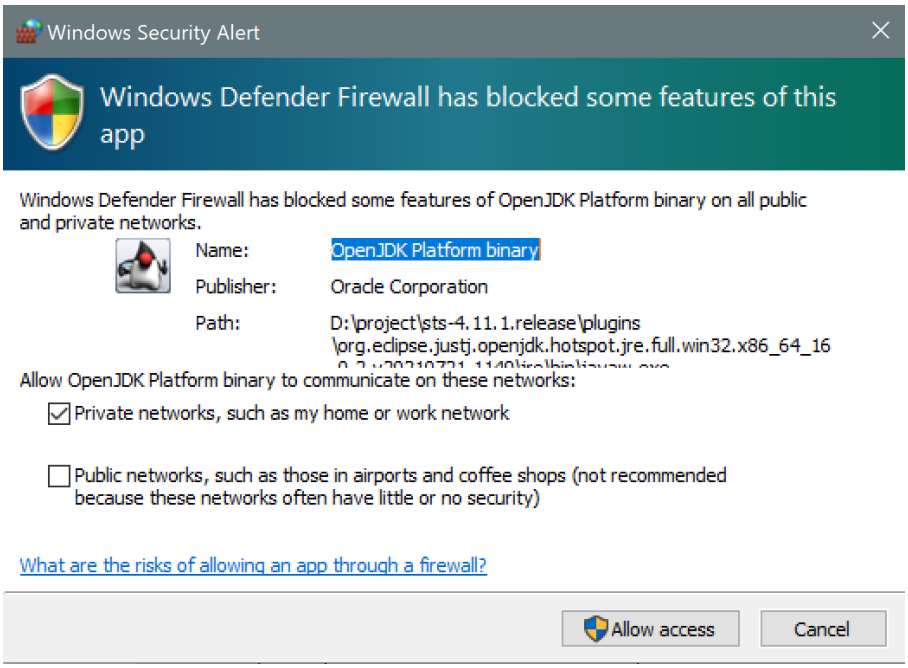


ii) **Step 2.** Right click on **"employee_management_system"** at the left panel > Select Run As > Spring Boot App

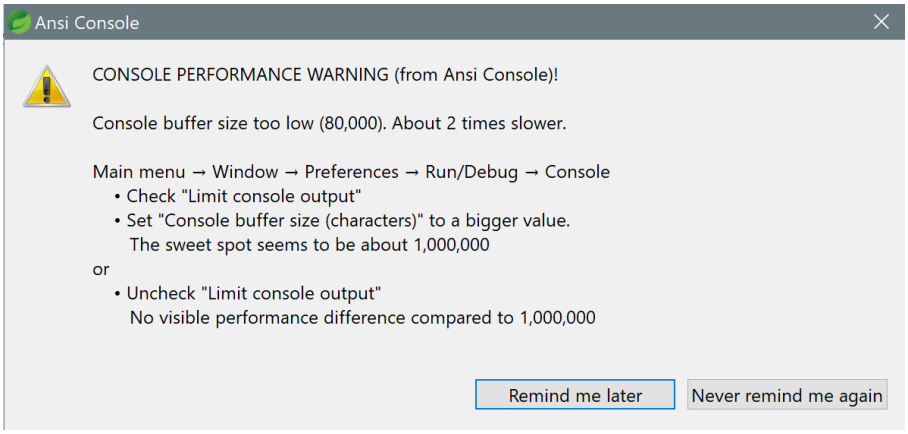


If we start this project for the first time, the application will ask Firewall permission. Please click Allow Access





Click on "Never remind me again" if you got "Console Performance Warning" below message



Then waiting a few seconds, when server is running successfully, you will see console screenshot as below:

```
main] org.hibernate.Version                    : HHH000412: Hibernate Core {5.3.10.Final}

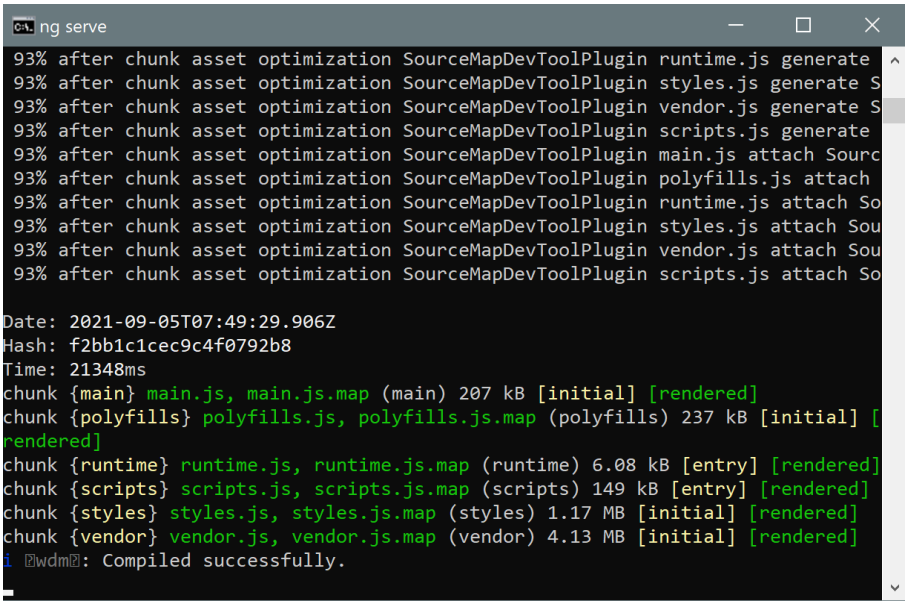
Application is Started Successfully

d) Run Angular Server

i) Open **CMD** and navigate to Angular Folder of project ***"employee_management_system_angular"***

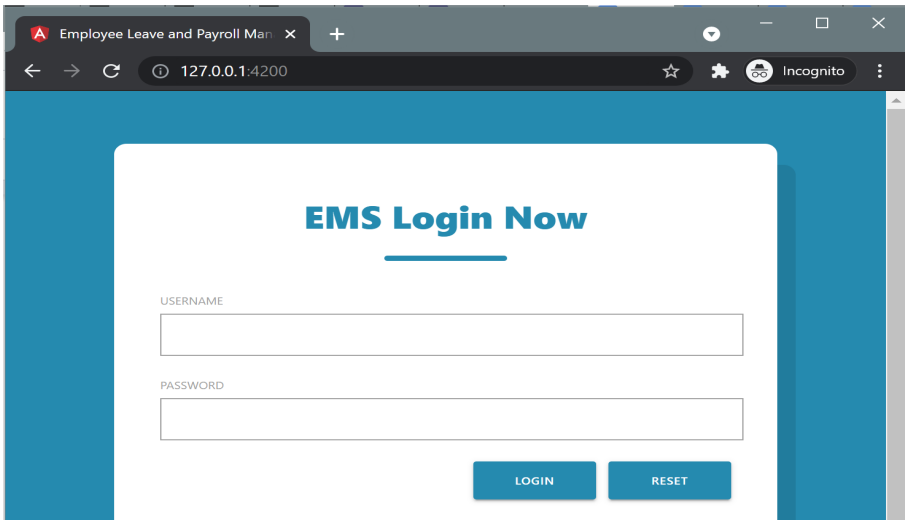
ii) *type and run* ***"ng serve"***

```
D:\Project\EMS\employee_management_system_angular>ng serve
```



The screenshot shows “Compiled Successfully”

iii) Open browser and go to http://127.0.0.1:4200/



The Login Page is displayed when accessing http://127.0.0.1:4200/

Summary: We completed setup and run web-based on a local machine. We can use the provided account to start to test this web-based.

- **Admin Account:** admin / test
- **Employee Account:** employee / test
